**DIVERSE GROUPING OF BUSINESS METHOD AND
COMPUTER & DATA PATENTS TO BE SOLD AT APRIL LIVE AUCTION**

Notification of Patent Rights, VOIP and Increased Disk Storage Capacity

Chicago, IL – April 5, 2007 – Ocean Tomo Auctions today announced it will sell lots offering a variety of patents ranging from business and computer technologies to data systems and storage methods at The Ocean Tomo Spring 2007 Live Intellectual Property Auction on April 19th at the Union League Club of Chicago.

One notable business method patent on the auction block includes a patent portfolio disclosing tools and techniques which provide notice of patent rights. This technology can be used to prove that an alleged infringer had knowledge of a patent without using expensive discovery and motion practice typically employed during patent litigation. Created by an experienced patent attorney, the invention provides a cost-effective alternative for placing potential infringers on notice of patent rights.

Another lot offers advancements in User Datagram Protocol (UDP) methods to achieve connectionless and packet-oriented for transferring data over a real-time distributed network. This technology is ideal for an assortment of applications, including Voice-Over-Internet-Protocol, which allows a user to make voice calls using a broadband Internet connection instead of a regular phone line.

An additional lot for sale discloses technology for increased storage capacity of an optical disk, which allows 40 to 100 times more capacity than a standard DVD. As reductions in planar size reach their limit, this pioneering portfolio offers a path to satisfy the continued push for additional storage capacity. This technology, recognized with a "Nano 50 Award" from *Nanotech Briefs*,

which identifies the top 50 nanotech inventions of the year, opens up a new dimension in the capacities of advanced optical storage.

“After careful review of all submissions received, we are excited to offer such valuable and diverse portfolios containing technologies which will make a direct impact within their respective industries,” said Andrew T. Ramer, President of Ocean Tomo Auctions.

Unique Acquisition Opportunity

Acquisition of these lots represents a unique opportunity for numerous industries including, but not limited to: Internet Service Providers, Information Management and Business Solutions Providers, Law Firms, Litigation Management Consultancies, Timepiece Manufacturers, Consumer Electronics Manufacturers, Handset Device Manufacturers and Software Developers, MRAM Architecture Designers, Computer Systems Designers, and Processor and System Bus Designers.

Summary of Technology Offerings

Lot	IP Assets Included	Description
1	US Patent 5,404,321	Methods for Reducing Keystrokes for Entering Text on a Mobile Device
21	US Patents 6,219,307 and 6,249,486	Linear Time Display for Telling Time Across Different Time Zones
22A	US Patent 6,278,660	Methods and Systems for Automatically Updating a Timepiece When Changing Time Zones
25A	US Patent 6,438,025	Techniques for Increasing Responsiveness of a Magnetosensitive Sensor
25B	US Patent 6,393,498	More Efficient Data Management in a Computer System through Memory Remapping
25C	US Patent 6,195,747	Techniques for Reducing processor Load and Bus Traffic in a Computer System while

		Handling Communication
25D	US Patent 6,772,367	Methods for Fault Tolerance in Concurrently Executing Computer Programs
25E	US Patent 6,557,058	Method for Sustaining a Constant Data Rate from a Media Source
25F	US Patent 6,901,525	Managing Power Consumption of IEEE 1394-Compliant Devices
25G	US Patent 6,879,556	Techniques for Increasing Storage Capacity of an Optical Disk
26	US Patent 6,879,984 and US TM Registration Nos. 2431828; 2433684; and 3026536	System for On-Demand Analysis of Datasets and Efficient Business Report Generation
27	US Patent 7,130,830	Systems for Providing Notice of Patent Rights to Third Parties
29	US Patent 6,405,236	Transporting Data Over a Real-Time Distributed Network
37	US Patents 6,175,616; 6,483,900; and 7,088,802	Systems for Detecting Status of a Communications Device over a Network
38	US Patents 6,304,898; 6,564,249; and 6,763,373	Systems for Creating and Sending Graphical Electronic Messages
